Torrin is on vacation.

Qi is filling in for him.

We don't have access to serve out services from production so I needed to alert a wide distribution. The state basically screwed up and said they were waiting on web services tomorrow to serve out data on the state website which is what Marty and the R6 OSC arranged.

I don't see any issue with me notifying Qi, Tim (Qi's WAM), Jerry, Scott.

Why so many people on the emails? Is this going to be common each time we set up services to include jerry, josh, etc?

Just wondering. Torrin is the guy and I don't even see him on the email.

You can always use the app, which shows all scribe data.. Easy to give access

9470930

.. ERT just needs to add the project

I agree with Marty, they kept switching tracks on this afternoon's call.

Since they want to test consuming an ArcGIS 10 service in ArcGIS 9.3.1 and have not yet decided what data they want to show, I wasn't even going to bother trying to push anything to orator until next week, since it is so far from production. I was going to use our cloud server for this proof of concept exercise. I'm completely open to a call tomorrow but realistically, if someone can just be on call for the holiday weekend I think that will be plenty. I don't think the state will have decided what they want until next week anyway when we have results data coming through.

If someone can take the action item to check in with ERT and make sure that the Scribe service on Orator production is the latest, that would be a good idea. And make sure the service is running. I can check staging.

That would be me. I negotiated the webservice but I think they are confusing sample data with ASPECT.

Who is working with the NM GIS people to make sure Orator can serve out web services to the state. We should probably have a quick call with Qi, Tim, and Scott to make sure we can serve out webservices from orator. The scribe service to Orator should still be there. We would just need Qi to deploy on production.

All samples that have been shipped up through today are in scribe and will get published tonight.

Dominic,

Here is the contact information for Brad and Melissa.

You should have gotten the DED from a different source.
